A. Course Content

School	Chung Sing School
Course	AI Creative Writing Class
Service Period	October 2026 - July 2027 (Thursdays)
Lesson Time	3:45 p.m. - 4:45 p.m.
Target Students	2 classes: P5 and P6; approximately 20 students per class (approximately 40 student works will be submitted for substantive editing, proofreading and possible inclusion in the final anthology.)
Class Arrangement	2 on-site classes conducted simultaneously, with 1 tutor assigned to P5 and 1 tutor assigned to P6
Terms	2 terms: 1st Term and 2nd Term
Number of Lessons	1st Term: 7 lessons per level; 2nd Term: 8 lessons per level; 15 lessons per level in total
Total Teaching Hours	1 hour per lesson per level, 30 hours (2026-2027 school year)
Special Request	- Substantive Editing: Refining and proofreading student drafts. - Visual Graphic Design: Creating a custom, visually engaging digital layout/anthology featuring tailored illustrations or graphics to showcase the students' best creations. - Final Output: Delivery of a print-ready PDF and a shareable e-book format for parents and the school community.

B. Course Outline

1. Course Rationale: This course helps upper primary students use artificial intelligence as a creative thinking partner while strengthening their own writing voice, story structure, vocabulary choices and revision habits. Students will learn how to brainstorm responsibly, develop original ideas, improve drafts and present polished creative works for a final digital anthology.
2. Learning Objectives
 - Develop confidence in planning, drafting, revising and presenting short creative writing pieces.
 - Use AI tools appropriately for brainstorming, vocabulary expansion, story planning and self-editing.
 - Strengthen narrative structure, descriptive writing, character development, dialogue and personal voice.
 - Understand basic responsible AI practices, including originality, fact-checking and not copying AI-generated text blindly.
 - Produce selected works for editing, layout design and inclusion in a final class anthology.
3. Expected Learning Outcomes

Area	Expected Outcome
Writing Skills	Students can plan and write short stories, poems or creative prose with clearer structure, richer details and improved language choices.
AI Literacy	Students can use AI prompts to generate ideas, compare suggestions and make independent decisions as young writers.
Revision Habits	Students can refine drafts through guided feedback, proofreading checklists and peer/self-review activities.
Creative Confidence	Students can share original work and explain how their ideas developed from planning to final draft.
Final Output	Selected student works will be prepared for a print-ready PDF and shareable e-book anthology.

4. Lesson Outline: The following outline provides a structured 15-lesson pathway. P5 and P6 classes may follow the same broad themes, with differentiated writing tasks, vocabulary support and extension challenges according to students' level.

Lesson	Theme	Key Focus	Student Output
1	Course Introduction: What Is AI Creative Writing?	Introduce responsible AI use, creative warm-ups and baseline writing task.	Mini writing sample and idea bank
2	Prompting for Ideas	Use simple prompt patterns to generate story seeds, settings and conflicts.	Three original story ideas
3	Building Characters	Create believable characters with goals, emotions, strengths and flaws.	Character profile
4	Setting and Sensory Description	Use the five senses and vivid vocabulary to build the atmosphere.	Descriptive paragraph
5	Story Structure	Plan beginning, problem, turning point and ending using a story mountain.	Story plan

6	Dialogue and Voice	Write natural dialogue and show character personality through speech.	Dialogue scene
7	Term 1 Writing Workshop	Draft a short creative piece using teacher and AI-assisted planning support.	First complete draft
8	Feedback and Revision Strategies	Use checklists to revise plot clarity, word choice and sentence variety.	Revised draft
9	Poetry and Image Writing	Explore metaphor, simile, rhythm and image-based prompts.	Short poem or image prose
10	AI as an Editing Partner	Learn how to ask AI for proofreading suggestions while keeping student ownership.	Edited paragraph with reflection
11	Expanding Scenes	Add action, emotion and detail to make scenes more engaging.	Expanded scene
12	Genre Experiment: Mystery / Fantasy / Future World	Apply genre features and creative constraints to a new short piece.	Genre writing draft
13	Preparing Work for Publication	Select best work, polish title, opening and ending; prepare author note.	Publication-ready draft
14	Peer Sharing and Final Refinement	Share selected work, collect feedback and make final language improvements.	Final manuscript
15	Showcase and Reflection	Celebrate completed works and reflect on writing skills, AI use and creative growth.	Reflection sheet and anthology submission

5. Differentiation Between P5 and P6

Level	Support / Challenge	Writing Focus
P5	More guided story frames, vocabulary banks, sentence starters and shorter writing tasks.	Focus on confidence, idea development, descriptive details and basic story structure.
P6	More independent planning, richer genre choices, stronger revision expectations and longer final pieces.	Focus on voice, structure, audience awareness, editing decisions and publication readiness.

6. Teaching and Learning Approach

- Short teacher modelling followed by guided practice and independent writing time.
- AI-assisted brainstorming and editing used as a support tool rather than a replacement for student thinking.
- Frequent sharing, peer feedback and teacher conferencing to improve student drafts.
- Use of writing templates, prompt cards, proofreading checklists and publication rubrics.

C. Final Output Details

The final anthology will be delivered as a professionally designed digital publication showcasing selected student works from the AI Creative Writing Class.

1. Print-ready PDF Specifications

- Size: A4 portrait format, suitable for school printing or professional print production.
- Estimated length: approximately 60-90 pages, depending on the final number and length of student submissions.
- Print settings: high-resolution PDF with 300 dpi images and CMYK colour mode where required by the printer.
- Bleed and margins: standard 3 mm bleed will be prepared where full-page backgrounds or edge-to-edge illustrations are used; safe margins will be maintained for text readability.
- Core components: cover page, contents page, section dividers, student work pages, selected illustrations or graphics, and closing pages where appropriate.

2. Recommended E-book Format

An interactive PDF is recommended as the primary e-book format for parent and school community sharing. It is easy to open on mobile phones, tablets and computers without specialist software, and can include a clickable contents page, clear navigation and screen-optimised viewing.

The e-book will be designed for comfortable reading on tablets and laptops, while remaining accessible on mobile devices through zoomable pages. If the school prefers a reflowable reading experience, an ePub version can be discussed as an optional add-on after the manuscript structure is confirmed.

3. Visual Design Direction

- Suggested theme: Combining students' imagination with a modern creative technology style.
- Layout style: clean, colourful and student-friendly, with strong readability and enough white space for young writers' work to stand out.
- Illustrations and graphics: tailored section dividers, AI-inspired graphic patterns, simple icons and selected custom visual elements to enrich the anthology.
- Typography: professional English fonts with clear heading hierarchy; decorative fonts may be used sparingly for cover or section titles only.
- Overall tone: polished, encouraging and suitable for sharing with teachers, parents and the wider school community.

4. Production Workflow and Estimated Timeline

Stage	Scope of Work	Estimated Time
1	Collect final student drafts and confirm the selection list with the school.	3-5 working days
2	Substantive editing, proofreading and editorial organisation of selected works.	1-2 weeks
3	Visual concept development, sample layout and design direction confirmation.	3-5 working days
4	Full anthology layout, illustration placement, internal quality checking and preparation of review copy.	1-2 weeks
5	School review, one round of amendments and final export of print-ready PDF and e-book file.	3-5 working days

通訊地址: 尖沙咀梳士巴利道 3 號星光行 533A

Estimated overall production time: approximately 4-6 weeks from receipt of all final student drafts and required school information.

Final deliverables: one print-ready PDF file and one shareable e-book version for digital distribution to parents and the school community.
